Not that you would but you could from Ultrafabrics®
Thanks to enhanced repellency and cleanability features, this one-of-a-kind solution protects from ink, denim dye*, red wine, mustard, and iodine-based stains. An ideal choice for high traffic upholstery applications in contract, healthcare, hospitality, dental, RV and marine, Ultraleather® | Pro is well suited for any project where looks, feel and performance matter.
*Removal of most denim dye may vary depending on the quality of dye and the period of time the stain sets in. Dye transfer is difficult to control, not always preventable, and may be irreversible.
